

# Managed Testing

Testing begins by understanding your organization. We listen to your challenges, explore the solution process together, and interpret the results data.

This starts with analyzing your current state. We examine your existing tools, technology, maturity levels, and what makes your applications unique.

We clearly define the engagement process for our comprehensive assessment. This is accomplished with detailed KPI's, alternative testing tools, and allocated role responsibilities and accountabilities.

Then the Testing begins. Testing is only as good as the Tester, using the best tools to their fullest functionality. This is what separates us from the competition. If you have the best testing tool, but don't utilize its full functionality in the proper manner, it's inadequate. If you have a good Tester, but that person does not have a full breadth of experience, there will be gaps.

Strategic Partnership that handles all of your testing needs

Industry experts with diverse project experience

Scalable teams that are highly available with a myriad of communication methods

On site, Remote, Offshore, Hybrid Delivery Options

# Turnkey Testing

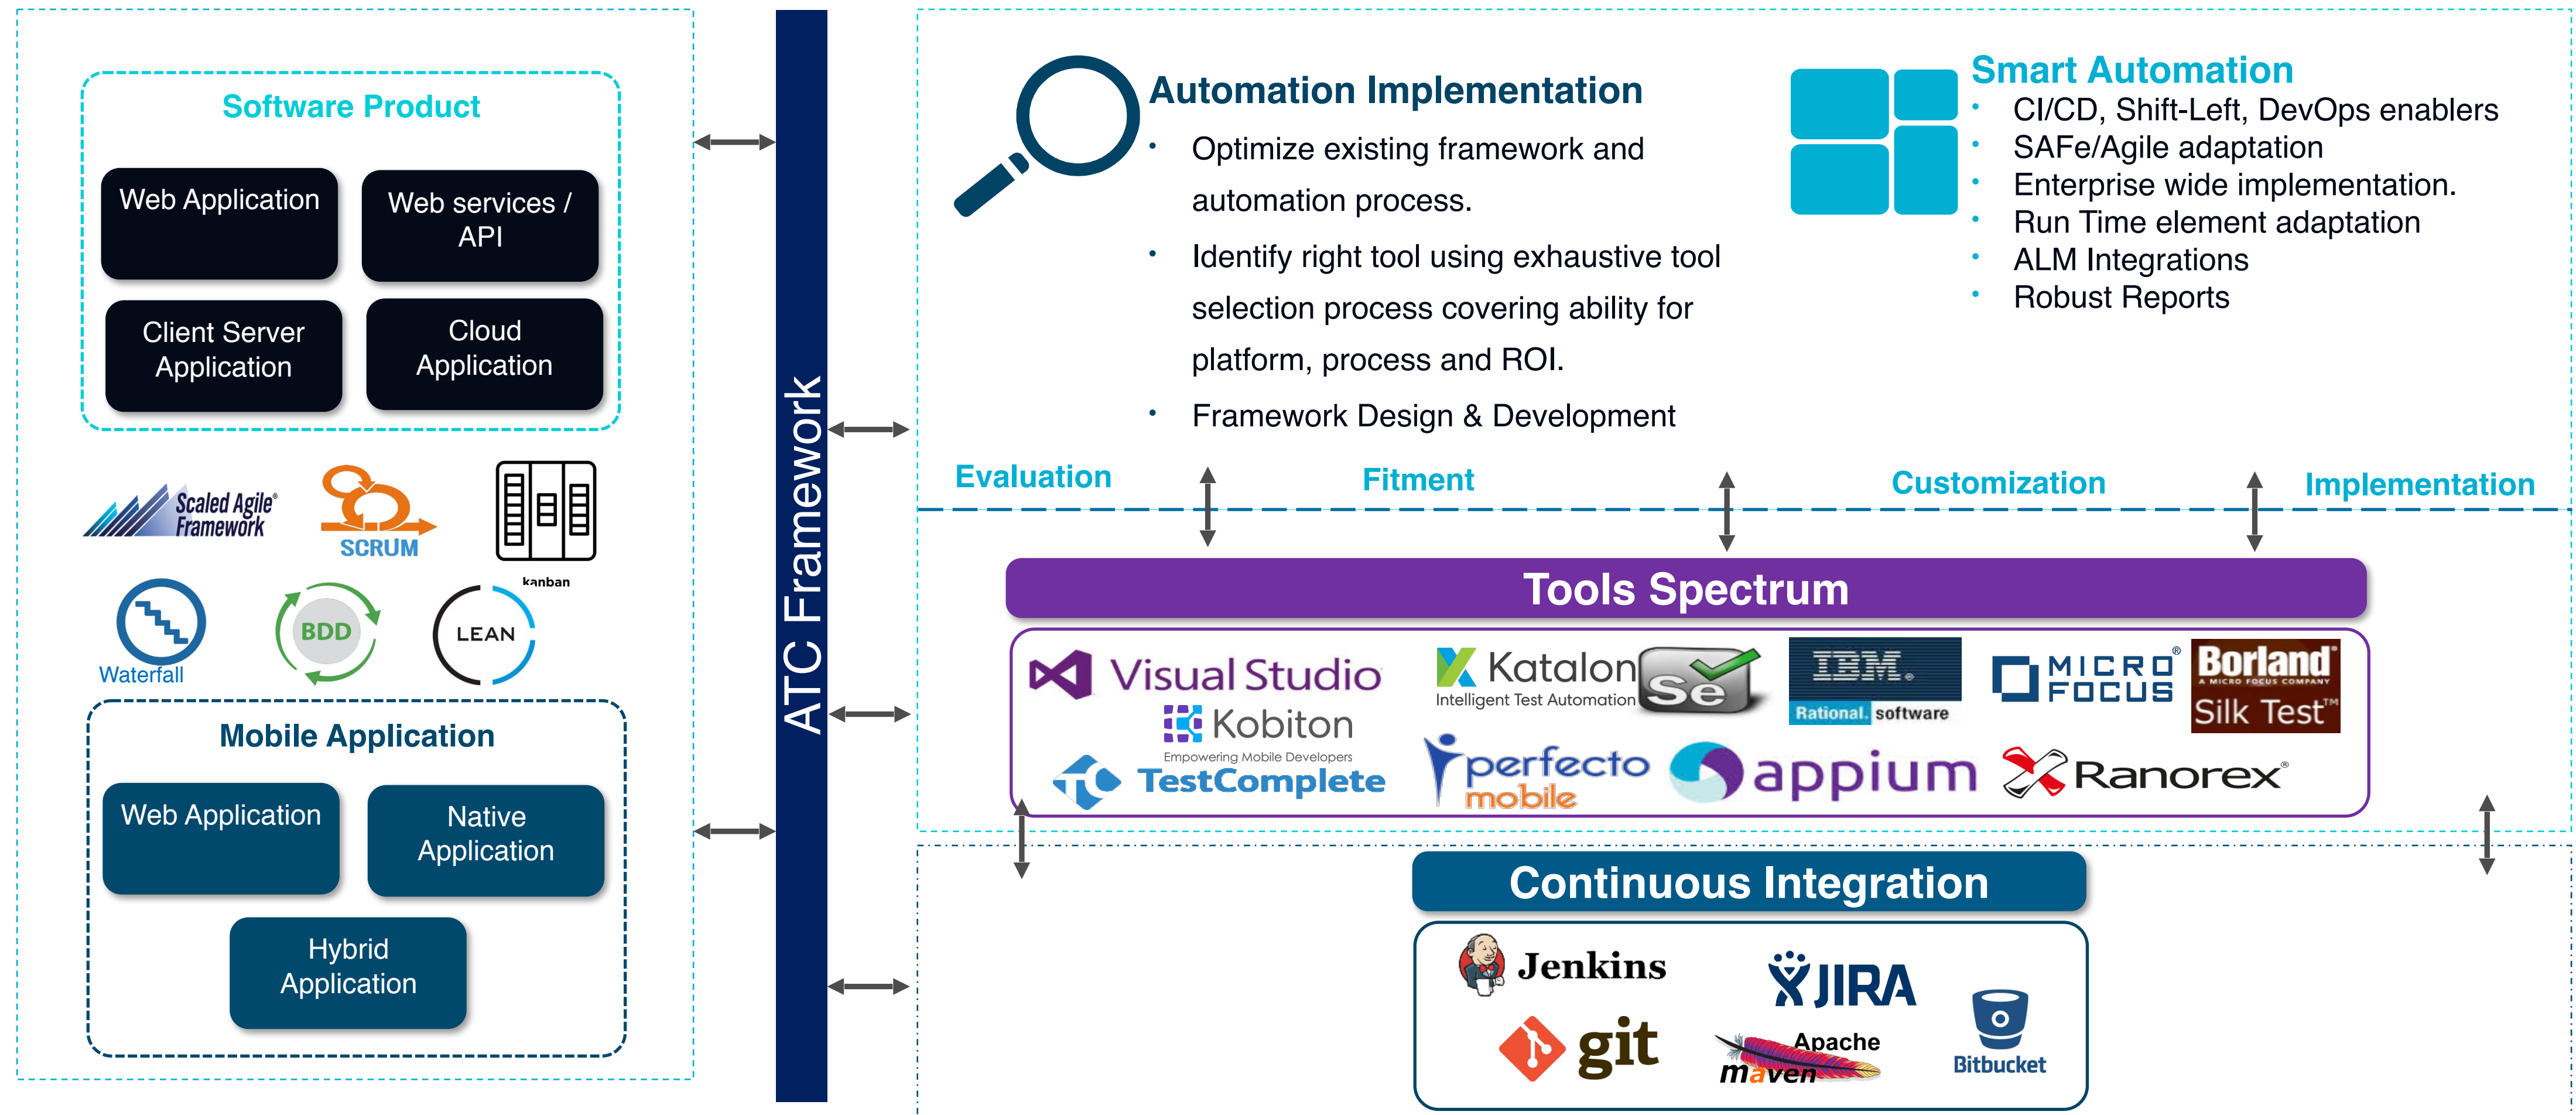

- Performance - Load, Stress, Spike, Endurance, Volume, Cloud Based Load Generation
- Security - Penetration Testing, Code Review, OWASP Risk Analysis, Session Management
- Automation - UI , API , Functional, Data Driven, BDD, Regression Test Suite Development
- System/Functional/User - Integration, Functional, Exploratory, Cross Browser, Device

Turnkey testing solutions afford your organization rapid deployment in a scalable scope. We use our tools and infrastructure to provide you quantifiable results. This supplements your existing processes and uncovers what you didn't know was missing.

# Benefits ATC Brings

- Business based automation (business scenarios coverage) reduces instances of false negatives or positives leading to higher quality.
- 15-20% of effort saving in script maintenance.
- Framework's user interface provides flexibility to select what scripts (business logic / GUI) you want to run, when you want to run and customizable report utility with complete traceability of test scripts.
- With pre-build components provide 30% faster time to automate.
- Single interface for Web, Mobile and API (SOAP/REST) testing.
- Integration with DevOps tools for complete end to end automation.
- Integration with ALM tools.
- Ability to import, sanitize and integrate existing selenium scripts.

# Automated Testing | ATC Approach

# Technology

### Technology

Microsoft .NET, WordPress, Bootstrap, Joomla!, jQuery, HTML5, CSS3, JavaScript, Java, PHP, Windows, Android, Ruby, Photoshop, AI, AngularJS, Apple, Perl, Node.js, Python

### Automation Testing Tools Expertise

hp, Visual Studio, Selenium, IBM Rational Software, Borland Silk Test, TestComplete, perfecto mobile, appium, Ranorex

### Performance Testing Tools Expertise

Load Runner, APACHE JMeter, SP 18.0 Silk Performer, LoadComplete, WEBLOAD

### Security Testing Tools Expertise

Zed Attack Proxy, Burp Suite, KALI LINUX, Metasploit, Wireshark, CHECKMARX, acunetix, sonarqube

### DevOps and CI

Jenkins, kubernetes

### Products

Enterprise Software, Cloud Application

Firmware & Devices, Mobility & Wearables

### Domain

Financial Markets, Banking, Insurance, CRM, Healthcare, Retail, Education, Travel & Logistics, HRIS
