

ATC

Move At The Speed Of Digital

In the digital era, failing to keep up with the pace of change leads to an inability to remain competitive. At ATC, we understand these challenges and have spent the last decade gathering the resources and expertise to help enterprises like yours move at the speed of digital.

WHAT IS AGILE?

Agile incorporates a collection of values and principles that enables self-organized, cross-functional teams to adapt to changing business needs and deliver value incrementally. Our Agile training courses provide certification and ongoing learning of Agile methodology across multiple levels. Whether just beginning the implementation of lean-agile practices, or wanting consistent support, ATC is the master of delivery for Agile skills, insight, and ethos.

COURSE RUNDOWN

If you're new to the world of Agile, consider taking ATC's "Agile Basics" course. Receive an overview on changing your team's mentality from a traditional SDLC (ex: Waterfall) model to the Agile process.

Why ATC?

We want more than to just train you. We want to be your long-term partner, which is why we provide pre and post training support.

- ✓ Preparation of a skill matrix to identify training needs and tracking progress,
- ✓ Micro learning after classroom training is complete,
- ✓ Bi-weekly lunch and learn meetings (two months),
- ✓ Monthly brown bag meetings (three months),
- ✓ Webinars through LMS available for one year
