

Talent To Move Your Business Forward

In the digital era, failing to keep up with the pace of change leads to an inability to remain competitive. At ATC, we understand these challenges and have spent the last decade gathering the resources and expertise to help enterprises like yours move at the speed of digital.

EXPERTISE BY DESIGN

ATC delivers exceptional talent as our experienced staffing experts connect you to a database of fully vetted, highly skilled technical candidates that also possess the right attributes for your culture. All of this while providing a fast, seamless process to ensure the best ROI for your organization.

CONTRACT

CONTRACT TO HIRE

DIRECT HIRE

Our proven, streamlined workflows enable our staffing team to work quickly, communicate clearly, and provide you with the highest level of care. We focus on three core competencies when placing candidates.

Technology

It is our bread and butter. We ensure talented, technically-efficient, and educated candidates who fit your job descriptions with their knowledge, experience, social and business acumen.

Culture

A best fit is more than what's put on paper. Adaptation, collaboration, and a sense of a harmonious work environment is key to making a culture click to work.

ROI

Hiring employees is costly. To ensure a return on investment, we dig through numerous work-related components to verify each employee gives back their worth during their tenure.

BUSINESS SOLUTIONS: A LOOK BEYOND

A decade-long leader in IT Staffing Services, ATC has evolved into a multi-product Business Solutions organization built around training, transformation, and tech.

Our additional capabilities encourage long-lasting partnerships built around technical services and needs that actively facilitates your company's ecosystem, thus outputting our knowledge and expertise as the demand arises. Other expertise includes:

DevOps and Testing PODS

ATC DevOps teams provide accelerated application delivery and quality to large enterprises by incorporating appropriate development and deployment framework.

Our Testing PODs offer end-to-end, fully customizable and scalable testing functions at the program or enterprise levels.

Lean-Agile Transformation and Scaled Agile Framework (SAFe) Training

Our certified Agile and SAFe training courses lead organizations through the transformation process with active, customized solutions to increase productivity, value output, and efficiency over time.

Robotic Process Automation (RPA)

RPA functionality enables software bots to automate repetitive, high-volume tasks for your organization, freeing workflows, and letting employees attend to more urgent matters.

Software Development for SaaS

We provide the right tools, processes, and people to take your SaaS products from ideation to execution. Our capabilities let us dive in during any stage of your development cycle, thus maximizing our reach for your products.

Why ATC?

At ATC, we don't treat our clients as one-offs. We are a people business focused on solving problems through innovative means. You can't solve problems without strong relationships and earned trust. Beyond staffing expertise, we adhere to great guidance, continuous training expertise, and adventurous exposure that backs our brand promise.
