

SAFe Training

Transforming teams for business agility and growth

In the digital era, failing to keep up with the pace of change leads to an inability to remain competitive. At ATC, we understand these challenges and have spent the last decade gathering the resources and expertise to help enterprises like yours move at the speed of digital.

WHAT IS SAFe?

Scaled Agile Framework (SAFe) integrates the “best practices” of Lean, Agile and DevOps into a set of principles and processes to scale value delivery.

Our Scaled Agile Framework (SAFe) training courses provide certification and ongoing learning of SAFe methodology across multiple levels. Whether just beginning the implementation of lean-agile practices, or wanting consistent support, ATC is the master of delivery for SAFe skills, insight and ethos.

SAFe ART QUICKSTART

ATC accelerates your Agile Release Train (ART) with SAFe ART Quickstart. After prep, we'll train your Agile teams in SAFe principles, practices and how to execute a Scrum/Kanban team working within a SAFe context.

COURSE RUNDOWN

Leading SAFe	SAFe for Teams	SAFe Product Owner/Product Manager	SAFe Scrum Master

Leading the transformation			

Why ATC?

We want more than to just train you. We want to be your long-term partner, which is why we provide pre and post training support.

- ✓ Preparation of a skill matrix to identify training needs and tracking progress,
- ✓ Micro learning after classroom training is complete,
- ✓ Bi-weekly lunch and learn meetings (two months),
- ✓ Monthly brown bag meetings (three months),
- ✓ Webinars through LMS available for one year
